

# Pre-tested®

## Oil Colors Color Selection Chart

The left side of each color sample shows the masstone (pure color from the tube). The right side shows a tint of one part color to one part Titanium White. Whites are shaded with Ivory Black on the right side.

The colors on this chart may vary from actual colors due to limitations of the color printing process.

| Opacity Rating       |                      | Lightfastness Rating |                |
|----------------------|----------------------|----------------------|----------------|
| □ = Transparent      | ◐ = Semi-Transparent | ◆ = Semi-Opaque      | ■ = Opaque     |
| ◑ = Semi-Transparent | ◒ = Opaque           | I = Excellent        | II = Very Good |
|                      |                      | III = Moderate       |                |

Pre-tested® is the name of Grumbacher's professional range of oil colors. It's also the name for a philosophy that permeates the way we manufacture all of our products.

Everything we make is tested again and again. Our time-proven formulas are fine-tuned through independent laboratory tests as well as hands-on trial by professional artists. We specify the best ingredients available, putting every new color through a rigorous selection process. We test samples of each and every batch of raw material before we allow our vendors to make shipments. On the factory floor, we sample batches in process. And finally, even after our products are in the field, we continue to track batches and test for quality, performance, and shelf life.

90 colors, 1.25 fluid ounce (37 ml) tubes.

Whites and Ivory Black also available in 5.07 fluid ounce (150 ml) tubes.

Made in the U.S.A.

Grumbacher carries a wide selection of oil and acrylic brushes including brand names such as Gainsborough and Finest Bristlette.
